## **FOR IMMEDIATE RELEASE**

### **HIGH PERFORMANCE AIR PARTS ANNOUNCES THE AVAILABILITY OF NEW FAA/PMA ENGINE BAFFLES FOR THE LYCOMING POWERED CESSNA 172P.**

New Prague, MN (February 7, 2006) High Performance Air Parts, LLC is please to announce the availability of NEW FAA/PMA approved engine baffles for the 172P. These NEW FAA/PMA approved engine baffles feature:

- Rugged Riveted Aluminum Constriction
- Powder Coated Finish
- Superior Silicone Seals
- FAA/PMA Approved
- Each piece may be purchased individually or as a complete set
- Made in the USA
- Available for immediate delivery

According to Tom Heid, President of High Performance Air Parts, LLC “These new engine baffle kits are a great way to dress up a newly overhauled or replaced engine. They also are very functional; a properly functioning engine baffle system greatly improves the cooling of your engine. The aircraft that we have engine baffle systems for are on average 30+ years old, so the original engine baffling is due to be replaced.”

#### **About High Performance Air Parts, LLC.**

High Performance Air Parts, LLC has engine baffles available for various Cessna aircraft, Cessna 150, 170, 172 (Continental Engine) 172P (Lycoming Engine) Cessna 180, 182, 185 and Cessna 206. High Performance Air Parts is the authorized stocking distributor of engine baffles manufactured by Airframes, Inc. of Big Lake Alaska. Engine Baffle systems for the Cessna 152, 172M-N, 177RG, Early 206, 207, 210, Early & Late T206, T207, T210, Piper PA 28-140 and PA 31 are under development.
